

What if we could STOP HARM before it happened? **Actually, we can.**

Most preventable harm is preceded by a string of related near misses. They offer valuable revelations into our vulnerabilities and opportunities for improvement. Detecting and correcting the root causes of near misses can prevent future adverse events. That's why making your Good Catches known is important!

Near Miss Reporting: It's all about LEARNING!

A near miss caught today could prevent an occurrence from happening tomorrow!

Learn to Report. Report to Learn.
